EDUCATION

University of Central Florida

B.S. in Computer Science / Dean's List / Bright Futures Florida Academic Scholarship

Orlando, FL

Expected May 2027

EXPERIENCE

Wells Fargo

Charlotte, NC

Software Engineering Intern – Wealth & Investment Management Technology

June 2026 – August 2026

- Re-architected a 20-year-old .NET annuity platform for **20,000+ advisors** with Spring Boot, React/TypeScript, pagination, and SQL rewrites; cut internal page loads **50–65%**.
- Designed machine-to-machine authentication and 24-hour entitlement caching, cutting entitlement-service calls from **five to two per session**; built permission-aware React views.
- Remediated **83** security and WCAG findings by patching insecure code, updating dependencies, and correcting nonconformant UI components.
- Piloted Devin AI for legacy-code analysis and story planning; published playbooks to a **2,500+ engineer** internal community.

Software Engineering Intern – Wealth & Investment Management Technology

June 2025 – July 2025

- Evaluated Pivotal Cloud Foundry and Red Hat OpenShift; presented a **15-page** comparison of deployment models, scaling, and developer workflows to engineering leaders.

Salt32 | salt32.com

Remote

Co-Founder & Software Engineer / Spring Boot, Python, AWS (SQS, S3)

April 2026 – Present

- Co-founded an AI-visibility platform that measures business mention and citation share across **four AI assistants** and produces actionable recommendations for customers.
- Built an idempotent scan workflow across **three SQS queues** with deterministic job keys, PostgreSQL conflict handling, stale-job recovery, and dead-letter queues.
- Implemented token-bucket rate limits, exponential-backoff retries, and provider isolation so outages return partial scans instead of failing customer reports.
- Added pre-call tenant budget checks to enforce scan-spend limits before requests reach external AI providers.

PROJECTS

StackRoast | *Next.js, React, TypeScript, Supabase/PostgreSQL, Redis, Stripe* | trystackroast.com | [github](https://github.com)

June 2026

- Built and launched a supplement-analysis application that evaluates user-entered stacks against **157 compounds** and **393 peer-reviewed references**; ingested and cleaned research data from **60+ sources** with Python workers.
- Developed a deterministic rules engine for dose, timing, and interaction analysis; cached identical stack evaluations for seven days and rechecked paid reports for material new research.
- Implemented Stripe checkout and Redis-backed abuse controls, including per-IP and per-email caching, rate limits, input validation, and webhook-safe fulfillment.
- Built indexable compound pages and scheduled research checks that refresh paid reports when new evidence may change a recommendation.

MemorAI | *FastAPI, FAISS, InsightFace, React, Azure Blob* | devpost.com

Sept 2025

- Built a FastAPI facial-recognition service for a caregiver-focused Alzheimer's prototype, using InsightFace and FAISS to match familiar faces and retrieve personalized memory prompts.
- Implemented multi-angle face enrollment with reference images in Azure Blob Storage and memories in Firebase, returning personalized text-to-speech memory prompts and photo slideshows to caregivers.

JPMorgan Chase Code for Good | *Next.js, React, Node.js, Firebase, Gemini*

Oct 2025

- Selected for JPMorgan Chase's Code for Good; on a five-person team, built and demoed a planning tool for the Black Heart Association in **under 24 hours**.
- Developed a public-health risk heat map, mobile screening-van route planner, and live insurance-policy feed to support outreach planning.

LEADERSHIP & AWARDS

Knight Hacks | Director of Outreach | [Knight Hacks VIII](http://KnightHacks.org)

Dec 2024 – Jan 2026

- Led a **nine-person** outreach team across UCF's CS and CE departments, growing dues-paying membership past **200** and helping deliver Knight Hacks VIII for **1,024 attendees**, **188 projects**, and **\$75K in prizes**.

Theta Chi | Director of Philanthropy, Secretary, Risk Manager, Scholarship Chair

Nov 2023 – Present

- Led a nine-person philanthropy campaign that raised **\$18,594** for the USO; elected to four chapter roles and received Theta Chi's international Resolute Man Award.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript/JavaScript, SQL, C#/.NET, C, Bash

Frameworks: Spring Boot, React, Next.js, Node.js, FastAPI, JUnit

Infrastructure & Data: AWS (SQS, S3), Azure, Docker, Kubernetes, Linux, PostgreSQL, Redis, Git, GitHub Actions, Splunk, Jira
